SONNEMAN[®]

A WAY OF LIGHT

cubix™

Cubix is an expansive and scalable system of interconnected modular architectural illumination.

SONNEMAN
A WAY OF LIGHT

constellation[®] cosmic cube[™]

Connected in linear strands, a dramatically suspended array of LED hubs forms the geometry of a bold cube of dazzling luminance. Scaled in two sizes, Cosmic Cube can be ordered in 20" and 30" configurations or customized for your project.

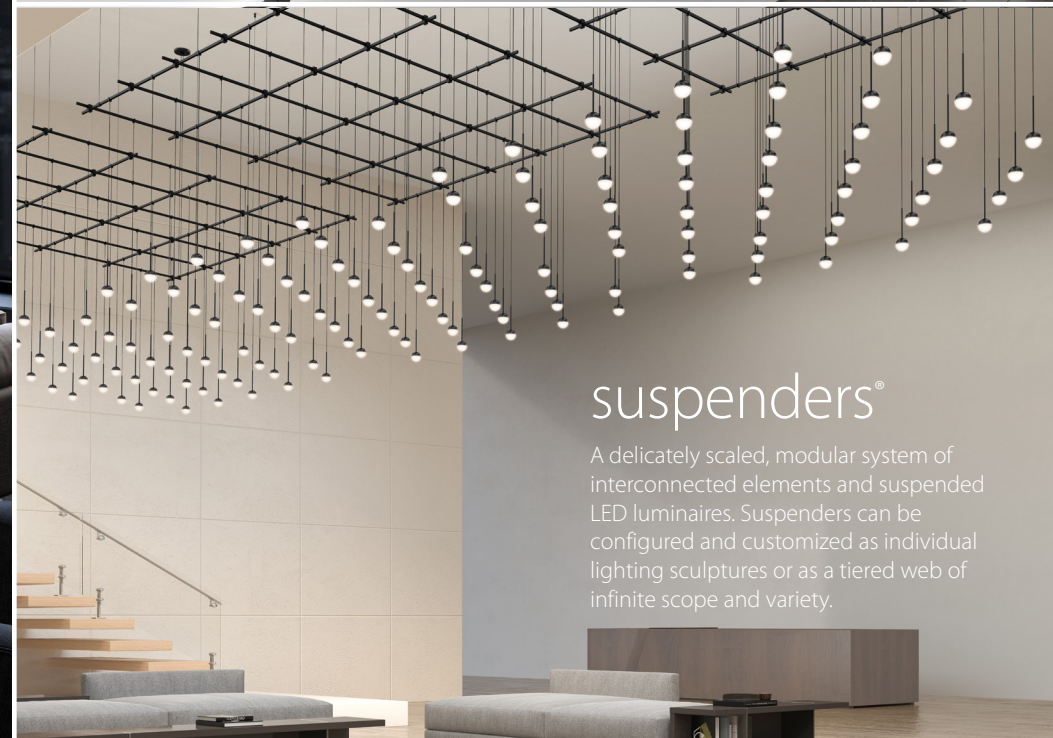

purolinear 360[™]

Purolinear 360 can transition between wall and ceiling mounting using corner connectors, as shown, providing an unbroken path of directable linear illumination throughout a space. Light can be directed in 360 degrees of rotation around its axis.

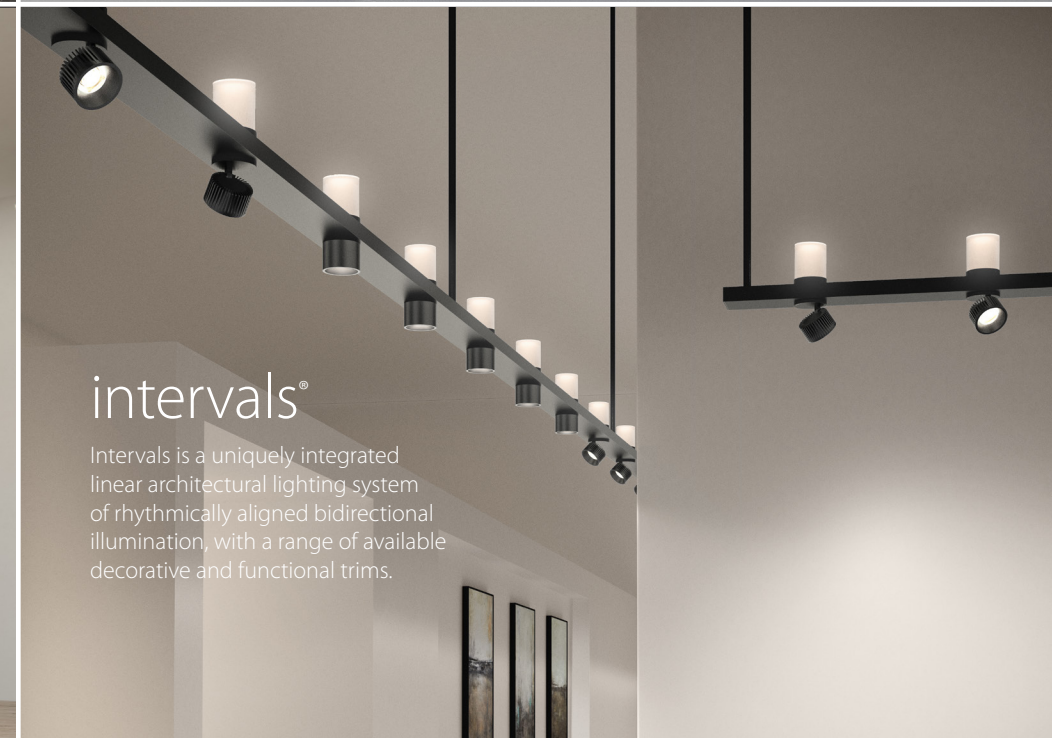

coral surface[™]

Flowing sculptural shapes connect clusters of luminaires across wall or ceiling surfaces in this organically modern system of light.

suspenders[®]

A delicately scaled, modular system of interconnected elements and suspended LED luminaires. Suspenders can be configured and customized as individual lighting sculptures or as a tiered web of infinite scope and variety.

intervals[®]

Intervals is a uniquely integrated linear architectural lighting system of rhythmically aligned bidirectional illumination, with a range of available decorative and functional trims.

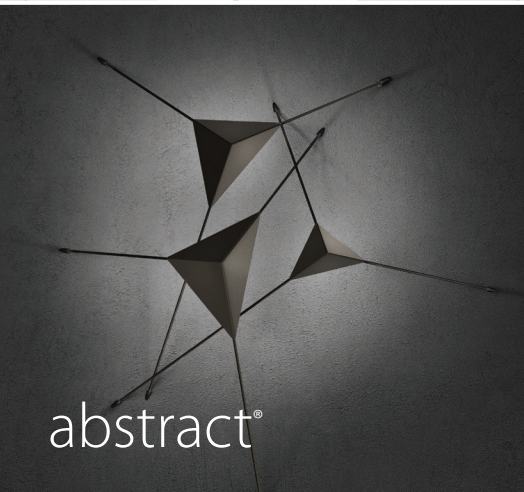

constellation[®] hedron[™]

Hedron is a spectacular celestial composition of radiant LED hubs connected by the triangular structural tension of minimal coaxial rods. The dazzling luminance and expansive scale forms a sculptural connection to the physical properties that define the galaxies of space, occupying a large volume with a low density of mass.
