

ADESSOCHARGE

INFORMATION & FACTS ABOUT
WIRELESS CHARGING

HENRY COLLECTION: 3459-15

WHAT IS THE WIRELESS POWER CONSORTIUM (WPC)?

The WPC is the worldwide governing body for Qi.

Qi is the worldwide standard for wireless charging. All major brand smartphones offering wireless charging work on the Qi standard. This means your Qi smartphone purchased in the USA can safely charge on a Qi charging module anywhere in the world.

All of the companies that developed the Qi wireless charging technology and hold the patents are members. They have pooled their patents together and only Qi Certified products are authorized to use the Qi logo and the related IP. The WPC is active in policing the markets for infringement copies and unauthorized use.

This is part of the reason why Adesso only makes Qi Certified products. The other reason is quality and reliability.

The WPC has created a very rigid and specific standard for Qi products. This will ensure the safe and proper operation of wireless charging. AdessoCharge customers will not be at risk of damaging their smartphones. That is only a risk for non-Qi certified product.

Please visit www.wirelesspowerconsortium.com/certified to view the potential risks of using any Qi imitation products.

Products using the Qi standard must be tested rigorously to help ensure safety, interoperability and energy efficiency. Only products that have passed these independent laboratory tests can use the Qi logo.

Scan the QR Code to view the potential risks of using any Qi imitation products.

AUSTIN COLLECTION: 4123-22, 4123-21

Qi certified products are listed on the WPC's site:
www.wirelesspowerconsortium.com.

Every Qi Certified product actually has a certificate. Adesso has an authentic Qi certificate for every AdessoCharge item we offer (Exhibit A).

SEARCH: An easy way to find out if a product is Qi certified is to search the WPC database:

You can search Qi products in this link:
www.wirelesspowerconsortium.com/products/search/

The WPC website contains a wealth of educational information on Qi.

Scan the QR Code to view the certified Qi products.

WINDSOR COLLECTION: 3214-22

AdessoCharge lamps include a wireless charging pad with Qi inductive charging technology. Many smartphones have this Qi technology built in, so you just place your phone on the pad and it will charge right up.

Most AdessoCharge lamps use a USB port located on the base and can charge a second device simultaneously with no reduction to the charging speed.

The charging pad will work when the lamp is plugged in, with the light on or off. It will charge your phone through most materials, you do not need to remove your case! Only metal or magnetic material will hinder the charging capabilities. The thickness of your phone case can alter the charging speed.

MANY SMART PHONES USE THE Qi CERTIFIED WIRELESS CHARGING TECHNOLOGY.

Current phones compatible with Qi:

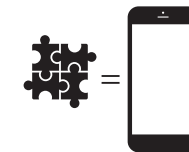

Apple iPhone 8 / 8 plus / X / Galaxy Note 8 / S8 / S8 plus / S7 / S7 edge / S6 / S6 edge / S6 edge+ / Nexus 4 / 5 / 6 / 7 / LG G3/ Microsoft Lumia 1520, 1020, 930, 929, 928, 920

NOTE: This list will be constantly changing as more phones are introduced, we can only expect this list to get longer and longer!

If your smartphone does not support Qi wireless charging, you can purchase a Qi compatible case, sold through a variety of retail channels. Be sure to use a Qi certified case.

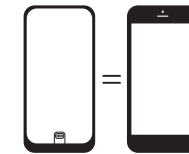

COMPATIBILITY

THE Qi CERTIFIED WIRELESS CHARGING TECHNOLOGY IS ACCESSIBLE TO ALL WITH A FEW DIFFERENT OPTIONS:

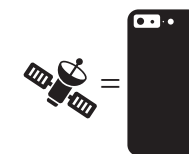

INTERGRATED Qi

Phone comes with integrated Qi certified wireless charging.

CHARGING CASE WITH Qi

A variety of retail channels sell smartphone cases that have the Qi certified technology built in. So all you have to do is put the case on and place it on the charging pad.

EXTERNAL RECEIVER Qi

You can also place an external Qi receiver underneath your favorite case, connecting it to the lightning port.

Scan the QR Code and read why wireless charging is here to stay.

EMERSON COLLECTION: COVER, 5131-21, 5131-22

APPLE: In September, 2017 Apple announced that their 3 new models would include Qi wireless charging technology. This created a huge buzz and interest in the wireless charging market. With such a loyal customer base, Apple has spearheaded an evolution of the how people will expect to charge their smart devices.

SPEED: Only recently has the technology of Qi gotten up to par with the speed of cable charging. With Adesso's 5W charging pads, you can expect a full charge in 2-3 hours.

CONVENIENCE: With Qi inductive wireless charging pads located in convenient places (cafes, airports, cars), consumers will quickly adapt and get used to this practice as the new "normal". Consumers prefer wireless. This was proven by Wifi. We used to have to plug in our computers to reach the internet, until Wifi came along. And now that is our "normal". We expect Wireless Charging to have the same effect on the USB cord.

Qi products are happening now, it's growing exponentially now. PowerMat was the first to bring wireless charging to the USA and joined the WPC earlier this year. PowerMat supplies wireless charging pads for Starbucks. Many Starbucks in the USA now have Qi modules in their table tops. McDonald's is also working in that direction. Many new cars are offering Qi modules as a standard feature. Aircharge is making the similar effort in the UK and Europe with their charging modules in public spaces.

CES: Refer to the WPC Qi blog article below - at the 2018 Consumer Electronics Show, wireless chargers using the Qi standard were being used everywhere in an array of different products. This is only more evidence of the inevitable adoption of wireless charging throughout all channels.

USE ALL ADESSOCHARGE PRODUCT WITH 3 SIMPLE STEPS!

Plug-in lamp to power up the Qi charging pad.

Line up the middle of your smartphone with the middle of the charge pad. Your device will indicate the charging process has begun by emitting an audible beep or a green light.

Sit back and relax while your smartphone charges up wirelessly!

CHARGE YOUR SMART PHONE WIRELESSLY.

MULTIPLE CHARGING

- 5W wireless charging on contact with the charging pad.
- Additional USB Port on Base.

CONVENIENCE

- Charges through most materials - no need to remove phone case!
- Only metal & magnetic materials will hinder charging.

QI CERTIFIED

- AdessoCharge product is Qi Certified.
- All product has been tested and verified to be safe and in compliance with the Qi Standard.

AdessoCharge will work with Apple iPhone 8 / 8 plus / X / Galaxy Note 8 / S8 / S8 plus / S7 / S7 edge / S6 / S6 edge / S6 edge+ / Nexus 4 / 5 / 6 / 7 / LG G3/ Microsoft Lumia 1520, 1020, 930, 929, 928, 920
