

trans globe lighting | 2018 catalog

We are delighted to introduce our newest and most comprehensive catalog to date. We, at Trans Globe Lighting, have great hopes for the year 2018 and the years to come.

It has been an exciting time in our industry because many changes have been happening all at once. The national push for greener living and energy savings required us to bring in more decorative fluorescent options and the ever-changing world of LED's has really been starting to flourish.

Inside this cover are some of the newest and most popular residential lighting fixtures of the time along with many of our classics that never get old.

From floor to ceiling and wall-to-wall, we cover it all, even the outdoors. We will be overjoyed if the product inside excites you as much as it does us.

To all of our loyal customers we thank you for your past and continued support. For over 30 years now your commitment has allowed us to keep offering more for less, and it is our steadfast commitment to continually improve our service to you.

We wish you all the best in the coming year; may it be the most fruitful of all

Sincerely,

*Your Trans Globe Lighting Team*

general terms and conditions

### **prices**

Prices are F.O.B. Trans Globe Lighting's Valencia, California warehouse and are subject to change without prior notice. All merchandise is invoiced at the current price at the time of shipment.

### **shipment allowance**

All shipments are F.O.B. Trans Globe Lighting's Valencia, California warehouse. Orders exceeding \$2,000.00 will be shipped freight collect with deductions for freight allowed, when invoice is paid within terms. This policy applies to accounts that are shipped within the continental United States. Orders of less than \$2,000.00 will be shipped freight collect. Charge by UPS/Fedex, or carriers not accepting freight collect will be automatically added to the invoice. Trans Globe Lighting reserves the right to select the carrier, unless special arrangements are made prior to shipment.

### **terms of payment**

Trans Globe Lighting's normal credit terms are Net 30 days from the date of the invoice. An interest rate of 1.5% may be applied to all payments past the maturity date.

### **returned goods**

Any or all claims for damages must be made with Trans Globe Lighting within 14 days after receipt of goods. After 14 days claims for damages will not be accepted, however, in many cases, replacement parts will be available to purchase. Merchandise cannot be accepted for return unless it is accompanied by a Return Goods Authorization (RGA) number, issued by Trans Globe Lighting. Returns must be freight prepaid made via UPS/Fedex, wherever possible. Trans Globe Lighting will not be held responsible for returned goods without an authorized RGA number. Returns for credit may be subject to a restocking fee of up to 25%.

### **bulbs**

Bulbs are not included with the fixture unless specified.

### **backorders**

Backorders are automatically generated and shipped unless otherwise requested.

### **special orders**

Special Orders must be in writing and are non-cancelable.

### **limited warranty**

Trans Globe Lighting will repair or replace, at our discretion, any fixture that fails to operate within one year of date of shipment. Trans Globe Lighting will not honor any claims for any improperly installed units, or those in which the parts have been altered or tampered. No charge backs or charges for labor or materials will be paid unless prior written approval is obtained from Trans Globe Lighting. Finishes are warranted for six months from the date of shipment for normal climatic conditions. In the case of extreme weather conditions, such as salty environment or acid rain, the finish will be warranted for three months. Except as stated above, there are no other warranties, expressed or implied.

energy star compliance

None of the items in this catalog are compliant to ENERGY STAR® standard unless mentioned.

## about energy star

ENERGY STAR® is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy helping us all save money and protect the environment through energy efficient products and practices. In 1992 the US Environmental Protection Agency (EPA) introduced ENERGY STAR® as a voluntary labeling program designed to identify and promote energy-efficient products to reduce greenhouse gas emissions. Computers and monitors were the first labeled products. Through 1995, EPA expanded the label to additional office equipment products and residential heating and cooling equipment. In 1996, EPA partnered with the US Department of Energy for particular product categories. The ENERGY STAR® label is now on major appliances, office equipment, lighting, home electronics, and more. EPA has also extended the label to cover new homes and commercial and industrial buildings.

Through its partnerships with more than 9,000 private and public sector organizations, ENERGY STAR® delivers the technical information and tools that organizations and consumers need to choose energy-efficient solutions and best management practices. ENERGY STAR® has successfully delivered energy and cost savings across the country, saving businesses, organizations, and consumers about \$14 billion in 2006 alone. Over the past decade, ENERGY STAR® has been a driving force behind the more widespread use of such technological innovations as LED traffic lights, efficient fluorescent lighting, power management systems for office equipment, and low standby energy use.

Recently, energy prices have become a hot news topic and a major concern for consumers. ENERGY STAR® provides solutions. ENERGY STAR® provides a trustworthy label on over 50 product categories (and thousands of models) for the home and office. These products deliver the same or better performance as comparable models while using less energy and saving money. ENERGY STAR® also provides easy-to-use home and building assessment tools so that homeowners and building managers can start down the path to greater efficiency and cost savings.

## improve your home

Households spend around \$1500 a year on energy bills. With ENERGY STAR®, you can save up to 30% or more a year. Improving your home to reduce energy costs will make your home more comfortable and help protect the environment.
