Troy RLM

Troy RLM sets the standard for Reflector Luminaire Manufacturer. We are primarily commercial or industrial lighting fixtures that are designed to reflect light in a downward direction.

Troy Lighting has been manufacturing RLM's in our USA facility for over 20 years. Many of our RLM's are inspired by historical lighting designs, but we have recently updated the RLM's by Troy Lighting to include some of the most unique modern, contemporary and transitional styles for this category.

Our latest Troy Lighting RLM catalog features the full array of our MADE IN USA fixtures, featuring a vast variety of finish, lamping, and mounting options.

RLM Structure

Luminaires can be mounted in a layout as opposed to individual fixtures.

Layouts can be customized to meet any criteria and most RLM shades are available. With 90º corners and 4-way octagon assemblies, RLM structure can be manipulate to create large rectangular designs or linear runs.

Ceiling structures can be suspended up to 8’ with 1/2” or 3/4” IP conduit, or supported with 6’ of aircraft cable. Luminaires can be suspended with 1/2” or 3/4” IP stems with lengths up to 8’.

For custom RLM structure quotes and layouts, please contact our facility. We will create a bill of materials to meet your needs along with a layout to reference.
