GS DESIGNS - WHO WE ARE

As the leader in the solar-powered lighting industry, GS-Design's artistic exploration became a partnership with our founding company Gama Sonic USA Inc. GS-Design's strives to create an intelligent mark in the solar lighting industry. We have collaborated a sophisticated yet elegant trend into our signature series by pairing them with our unique patented technologies.

OUR MISSION... WHY SOLAR?

GS-Designs strives to brighten your perimeter by using our most abundant natural resource; the sun. Our unparalleled passion for quality fuels our continued search for engineering solar lighting and industry ingenuity. In fact, our core value of "Endless Innovation" inspired us to cultivate our newest series of distinctive, environmentally friendly lighting solutions. GS-Designs offers you an essential yet unique; efficient sustainable resource to your lighting investment.

Why Our Break Through Technology Matters!

No matter what outdoor lighting challenges you face, choosing a technology-rich solution makes all the difference. While solar-powered products have been around for some time, it took the research and development expertise of Gama Sonic's engineers to create rechargeable lighting designs that outshine and outlast every major competitor. That means you will enjoy a safer, reliable and more cost-effective investment for your outdoor lighting budget.

We Make Hi-Tech Beautiful

A technologically advanced product will not mean much if it does not enhance the visual aesthetic of its environment. That is why Gama Sonic USA consistently earns rave reviews for outdoor lighting products that are elegant, tasteful and eye catching. We constantly stay ahead of the design curve by creating and testing product casings that fit a wide variety of residential and commercial décor. Ranging from simple to sophisticated, our products can accommodate the desired style that you seek.

Together We'll Help Save the Planet

The writing is on the wall — we must reduce our carbon footprint to ensure a habitable environment for the next generations to come. GS-Designs by Gama Sonic can help you make an environmentally positive statement in your home or business with leading technology designed to do just that. Our laser focused approach to research, evaluation and development means the solar powered lighting product that you select will exceed recommendations for clean renewable energy use.standard electrical light bulb.

Our Patented Technologies

The GS Solar Light Bulb is a brand new patented technology that joins the conventional light bulb idea for outdoor solar lamps and posts. The GS Solar Light Bulb paired with our patented cone reflector boasts a 10-year operational life in an elegant, classic design. This unique combination not only boasts a warm and inviting blanket of light across any area, but it also gives the lantern a refined, traditional look that resembles a standard electrical light bulb.

The GS Solar LED Light Bulb

Patented Solar Technology

The GS Solar LED light bulb is our latest utility patent we have accomplished. As a pioneer of modern solar lighting technology, our Patented GS Solar LED Light Bulb replicates the conventional look and feel of the traditional style light bulb.

Longevity

Lasting for 100,000 hours, the GS Solar light bulb requires no replacement and matches the lifespan of the lamps themselves, which is roughly 10 years.

Color Temperature

The GS Solar LED light bulb is available in both warm white or bright white temperatures. By default, our solar lamps deliver warm white light color, creating a natural look of an incandescent light bulb in a solar lamp setting. If you're looking for a brighter white color temperature all you need to do is swap the solar light bulb.

Variety

GS Designs is the leader in manufacturing upscale solar lights for residential and commercial applications. We have upgraded our outdoor solar lights to equip the new solar light bulb. Our newest patent in the solar lighting industry is now available in six series and counting.

WORKS ONLY WITH GS-DESIGNS BULB SERIES FIXTURES

Residential Lamp Posts

Our solar lamp posts with one, two or three lamp heads offer full-sized outdoor lighting solutions for home owners. They can be installed anywhere with no pre-existing hardware or utility service required.

For anyone looking to upgrade an existing lamp post with an energy-saving, money-saving solar lamp head, we offer solar light fixtures with different post-mounting styles. We also have a wide range of wall-mounted solar light fixtures.

All of GS-Designs' light fixtures are engineered for dusk-to-dawn performance and include our patented cone-reflector technology to help cast light in all directions.

Turn your Commercial Property into an Energy Efficient Light Source!

Align your properties with our prestigious commercial solar lights that add value to any property while remaining cost-effective. Gama Sonic's commercial grade solar lights are the perfect solution to reduce rising electrical costs while also enhancing curb appeal. Gama Sonic's commercial grade solar lights are suitable for any park or community looking for a light that is maintenance free, eco-friendly and cost effective.

Since the Imperial II was first introduced to the market in 2013, Gama Sonic has sold tens of thousands of units nationwide; making it our number one best-seller. The Imperial II is the solution for parks, communities, homeowner associations, municipalities and residents looking for a reliable, bright and long-lasting solar light.

In 2017, Gama Sonic added another commercial grade solar light to the collection— Everest II. The Everest II is our brightest light as a single head lamp unit, shining at 500 lumens. Perfect for commercial properties looking to illuminate a vast amount of space with an abundance of light.

Gama Sonic has been the leading manufacturer for outdoor solar-powered lamp post lights for the past 17 years; We are constantly innovating the latest technology and researching trending innovative designs which has led to include more than 20+ utility and design patents.

IMPERIAL II
COMMERCIAL GRADE SOLAR LAMP

Each Imperial II lamp head provides a stunning 300 lumens of 6000k bright-white light, making this series ideal for residential and commercial applications.

COASTAL APPROVED LAMP COLLECTION

POLARIS SCONCE

SOLAR WALL MOUNT LAMP SERIES

with GS Solar LED Light Bulb

Illuminate your yard with a warm glow from our Polaris solar lamp series. The Polaris solar lamps are all weather-resistant, durable solar lights suitable for both commercial properties and residential homeowners. This solar lamp collection comes in four different application settings, perfect for DIY enthusiasts who want to update their exterior lighting.

The Polaris solar lamp series adds sophistication to your curb appeal with its heavy-duty resin construction, rigid design, decorative finial; making it the perfect outdoor lighting solution for coastal communities. Offered in classic white or black finishes, the Polaris solar lamp series coordinates easily with any style of home or neighborhood.

The Polaris solar lamps feature our GS Solar LED light bulb in a warm-white light, and a high and low switch which allows for you to control your light output. Illuminate your yard with the Polaris solar lamp series.

MORPH TECHNOLOGY

These unique solar lamps are designed with our newest revolutionary solar innovation – Morph Technology (Patent Pending). Gama Sonic's New Morph Technology is a groundbreaking process allowing our fixtures to harness more power from the sun.

This new process enables us to apply solar cells to curved surfaces and uneven shaped fixtures. The advantage allows us to use surface that wasn't available for traditional solar panels before. The results of the morph technology: Larger solar panels on a given fixture, more charging power on a daily basis and a brighter light with longer battery duration for your solar light.

SOLAR ACCENT & UTILITY LIGHTS

PREMIER
SOLAR GARDEN LIGHT

2 PACK

139201-5

Durability: All of our accent lights are made from high-quality materials and are durable for all seasons; lights typically last for 10-15 years.

Longevity: All of our solar lights are designed to offer consistent brightness from dusk-to-dawn, making them an ideal, hassle-free replacement for low-voltage landscape lighting systems.

Reliability: Our long-lasting Lithium Ion battery packs are designed to store solar energy collected by the sun; the average lifespan of our batteries is three years.

Two-year limited warranty

All products purchased directly from Gama Sonic and authorized dealers have a limited two-year warranty. If within two years from the date of purchase, the product fails due to a defect in material or artistry, Gama Sonic USA Inc. will repair or replace the product free of charge with proof of purchase. For further details on our warranty policy, please visit gamasonic.com/support/warranty
