Exterior LED Lamp Wall Sconce

START FROM HERE

• Make sure power is completely off at the fuse box.
• Have your fixture installed by a qualified licensed electrician
• Prepare everything in a clear area.
• Wear gloves at all times during this installation.
• Read instructions carefully before you start assembly.
• Keep this instruction sheet for future reference.

Technical Support: 1-855-855-8926

Please Note:
• All Kuzco LED fixtures come with pre-wired LED module(s).
• Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
• For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

1. Remove the fixture from its original packaging. Remove the mounting plate **(1c)** from the fixture **(2a)** by removing the screws **(2b)**. Attach the mounting plate **(1c)** to the electrical junction box **(1a)** using the screws **(1d)** provided in the hardware package.

2. Connect all wiring with the provided marrettes **(1b)** (white to white "N", black to black "L", ground to ground "G"). Attach the fixture **(2a)** to the mounting plate **(1c)** and secure with screws **(2b).**

3. You have now completed the installation of your fixture, enjoy.

IMPORTANT: To prevent moisture from entering the outlet box and causing a short, seal around the top and side perimeter between the fixture and the wall surface with weather resistant caulking (see illustration 1). The space at bottom should be left un-caulked to prevent moisture build-up.
