Description: Intervals is a uniquely integrated linear architectural lighting system of rhythmically aligned bidirectional illumination, with a range of available decorative and functional trims. Architecturally scaled, the suspended horizontal beams span long lengths within a space, supported from ceiling-mounted cables or stems, forming a dramatically powerful approach to illuminating architecturally expansive locations. SONNEMAN's new **INTERVALS Recessed Downlights** extend and support these Intervals Linear Beam Pendants. Together, they achieve a comprehensive and unified approach to dynamically lighting interior spaces.
