ASTA OTTOMAN BLACK LEATHER

YC-1041-02

THANK YOU FOR YOUR PURCHASE!

Dear Customer,

Congratulations on your purchase of a piece of furniture made from American Black Walnut.

The individual wood slats in your piece of furniture are especially selected and sorted by hand by skilled craftsmen. They follow specific guidelines securing the quality demands and design preferences that lay out the form of this furniture range. Wood is a living material, affected by temperature and moisture for a long period after you start using it. Thereby, table tops and top plates will expand and shrink according to the seasons, and tiny cracks in the wood that may occur, are some of the joys of owning a natural product.

To make sure that you will enjoy many years of satisfaction with your piece of furniture, it is imperative with the right care and maintenance. Kindly follow the below guidelines, and we guarantee that your unit will stay beautiful in the years to come. It is our recommendation that you ask your furniture supplier for advice in any instance. Furthermore, we strongly suggest that you use the furniture oil that is available from your furniture store. The instructions will be stated on the product.

Your piece of furniture is already oil or soap treated from the factory. How often should the piece of furniture be treated with oil?

1. Preferably already before use
2. The surface should be treated when necessary, and we suggest as often as every three months

How do you apply the oil to the piece of furniture?

1. Apply plenty of oil with a clean cloth. Table tops must be treated underneath as well as on the top side. (Do not drop oil on the floor!)
2. After 15 minutes, polish with a sandpaper sponge or fine sandpaper (no. 150) along the grains of the wood
3. Polish off remaining oil with a clean, dry cloth
4. Do not use the item, until the oil is completely absorbed

Daily maintenance of both oiled and lacquered surfaces:

1. Clean the surface with a clean, wrung out cloth. Never use detergents
2. Coloured stains like red wine must be dried off immediately
3. Smaller stains and marks can be polished off with sand paper no. 220 or 180
4. Avoid extreme humidity and heat. Do not place the item close to heat sources
5. Legs for coffee and dining tables must be fastened occasionally

Leather care guide

Leather is a natural product, which means every hide is different. Markings, scars and differences in the texture and colour will vary from piece to piece. Your leather upholstery furniture will develop more individual character with age, more so on most used areas like seat cushions. This means your upholstery furniture will become even more special and unique over time.

To maintain the quality of your leather furniture, please follow the cleaning procedures outlined below:

Vacuum or dust frequently with a clean, dry cloth. If leather is soiled, it can be wiped with a soft, damp cloth using a mild, neutral-ph and non-detergent liquid soap with lukewarm water. Do not spot clean leather; clean the entire surface.

To keep the leather soft and supple, and to avoid cracking, it is necessary to apply a good leather conditioner every 6 to 12 months. This will help your leather maintain its own natural oils, keeping it soft and supple for many years.

Let the leather air dry; never use a hair dryer or any other heat source to dry leather.

Protect against excessive sunlight, dryness and heat.

- Sunlight will fade and dry out leather.
- Dryness will cause leather to crack.
- Heat will dry out the leather and cause further damage.

DO NOT USE CHEMICALS, SADDLE SOAP, CLEANING SOLVENTS, FURNITURE POLISH, OILS, VARNISH, ABRASIVE CLEANERS, SOAP OR AMMONIA WATER.

These are recommended methods of cleaning. The manufacturer is not responsible for damage occurred while cleaning. Always try the cleaning method in a hidden area first to see the results.
