

Please go to [www.quoizel.com](http://www.quoizel.com) for product cleaning tips. Go to the **Care + Maintenance** selection.

**Tools Required:** Flathead screwdriver, Phillips screwdriver, pliers, wire cutters, wire strippers, electrical tape, safety glasses.

**Light Source:** (3) A19 Medium Base Bulbs 100W Maximum, bulbs not included.

**Fixture Hanging Height:** Minimum Hanging Height is 28.5", Maximum Hanging Height is 78".

**Estimated Assembly Time:** 30-45 minutes

**Preparation:** Identify and inspect all parts before beginning installation. Check package content list and diagrams below to be sure all parts are present. If any parts are missing or damaged, do not attempt to assemble, install, or operate the fixture. Contact your original place of purchase.

**⚠ Warnings and Cautions**

Turn off electricity at circuit breaker or main fuse box before installation. Consult a licensed electrician if in doubt.

These instructions are provided for your safety. It is very important you read them completely before installing the fixture. We strongly recommend that a licensed, professional electrician perform the installation.

Disconnect fixture from power source before replacing bulbs. Make sure bulbs are given sufficient time to cool before removal.

**⚠ Care of Tiffany Style Shade**

A new tiffany lamp shade has an oil film applied to the shade that protects the tiffany shade from scratches during shipment. If the oil applied is too heavy you can remove the excess oil film with a paper towel. Gently wipe away the excess oil.

For general cleaning of tiffany shades use a gentle lemon oil-based furniture polish applied to a soft cloth and wipe gently.

If a white powder appears on the soldered joints of the tiffany shade this is a normal oxidation process. Use a small amount of lemon oil or mineral oil applied directly to oxidized areas and the soldered area will return to like new.

Package Contents	Hardware Contents
<p>A Fixture Loop x 1</p> <p>B Arm Assembly x 1</p> <p>C Socket Assembly x 1</p> <p>D Nipple 5.5" L x 1</p> <p>E Spacer Tube x 1</p> <p>F Check Ring x 1</p> <p>G Shade x 1</p> <p>H Finial x 1</p>	<p>AA Crossbar Assembly x 1</p> <p>BB Fixture Chain x 1</p> <p>CC Quick Link x 2</p> <p>DD Ceiling Canopy x 1</p>

**STEP 1 - Install Fixture Loop, Arm Assembly and Socket Assembly together**

- A. Unfold the arms to proper locations.
- B. Thread the Arm Assembly (B) onto the Socket Assembly (C) and hand tighten until snug.
- C. Thread the Fixture Loop (A) onto the nipple on the top of the Arm Assembly (B). Tighten until snug.

**STEP 2 - Install the Crossbar Assembly to Outlet Box and Adjust the length of the Nipple**

- A. Attach the Crossbar Assembly (AA) to the Outlet Box with the head of the Green Ground Screw facing you. Secure it with Outlet Box Screws (not included), tighten until snug.
- B. Adjust the hex nut and lock washer underside of the crossbar to the middle of the nipple.

### (Step 2 Continued)

- C. Remove the canopy lock ring from the canopy chain loop. Place the Ceiling Canopy (DD) over the canopy chain loop against the ceiling to determine the correct position of the nipple. Thread the canopy lock ring onto the canopy chain loop. Adjust the nipple to allow the Ceiling Canopy (DD) to rest against the ceiling when held in place by the canopy lock ring.
- D. Remove the canopy lock ring and the Ceiling Canopy (DD). Tighten the lock washer and the hex nut against the crossbar to secure in place.

### STEP 3 - Install the Fixture Chain and Ceiling Canopy

- A. Adjust the Fixture Chain (BB) to your desired length by removing links if needed. Put a cloth over the Fixture Chain (BB) to protect the finish.
- B. Pull the supply wires through the Fixture Chain (BB) alternating links. After the wires are through the Fixture Chain (BB), pull the Supply Wires and the Ground Wire through the canopy lock ring and the Ceiling Canopy (DD) in order.
- C. Attach one end of the Fixture Chain (BB) to the Fixture Loop (A) with one Quick Link (CC). Lift the fixture and Fixture Chain (BB) up and attach the other end of the Fixture Chain (BB) onto the canopy chain loop with another Quick Link (CC). The fixture will now hang safely.
- D. Feed the Supply Wires and Ground Wire through the canopy chain loop and nipple into the outlet box. Cut the wires leaving approximately 8" of wire extending from the Outlet Box.
- E. Go to Step 4 for wire connections and follow the directions. Return to Step F in this step when complete with Step 4.
- F. Raise the Ceiling Canopy (DD) and canopy lock ring up the Fixture Chain (BB) and over the canopy chain loop. Tighten the canopy lock ring onto the canopy chain loop until tight.

Suggested chain length for Ceiling height :  
8' ceiling : use 6 links of chain and 2 quick links  
9' ceiling : use 16 links of chain and 2 quick links  
10' ceiling : use 26 links of chain and 2 quick links

Figure 3

### STEP 4 - Making the Wire Connections

- A. Wrap bare or green ground wire around green ground screw on the crossbar, no less than 2 inches from the end of the wire. Tighten the green ground screw.
- B. Use standard wire connectors (not included) to make all wire connections. Twist connectors until wires are tightly joined together. Wrap each connection with approved electrical tape and carefully stuff all the connected wires into outlet box.

Note: If the electrical wire is going to be cut shorter than provided you will need to identify the "L" line wire and the "N" neutral wire before you cut the excess wire off. One is labeled N and the other labeled L. To do this separate the "L" line wire and the "N" neutral wire as far as you need to. Re-label the wire near where you want to make the cut. Be sure to mark the wire on the side of the fixture and not on the excess wire being cut and removed.

Figure 4

### STEP 5 - Install Shade and Bulbs

- A. Remove Knurled Nuts from the Nipple (D).
- B. Thread the hex nut end of the Nipple (D) into the hex coupling underside of the Socket Assembly (C). By using pliers, thread the hex nut against the hex coupling and hand tighten until snug.
- C. Place the Spacer Tube (E) and the Check Ring (F) over the end of the Nipple (D) and secure with one knurled nut. Hand tighten until snug.
- D. Thread another knurled nut onto the end of the Nipple (D) and adjust it to proper location for the Shade (G) and the Finial (H).
- E. Place the Shade (G) onto the end of the Nipple (D) and secure with the Finial (H). Hand tighten until snug.
- F. Insert bulbs onto sockets and screw snugly into place.

Your fixture is now assembled and ready to use. Enjoy!
