

LED Product Information and Warnings

Important

- **Always disconnect the power before installing or replacing bulbs and before cleaning or other maintenance.**
- **Consult a qualified, licensed electrician to ensure correct branch circuit conductor.**

- Please read all included assembly instructions and warnings carefully before installation. Contact Customer Service if you have any questions or concerns. Before installation, please confirm that the fixture is compatible with your supply voltage and dimming system, if present.
- LEDs are highly sensitive electronic devices, and must be treated with care. Do not open any factory sealed compartments, and avoid touching the LEDs with your hands or any object.
- Although all our fixtures are equipped with protective devices, LED fixtures are vulnerable to power surges and supply variations. Do not install LED fixtures on the same circuit as any motors, appliances, or HVAC systems.
- Do not remove or bypass any LED Driver or Transformer that is provided with the fixture, and do not replace or substitute with another power supply.
- Remote LED Driver or Transformer installation must be done by a licensed electrician and in accordance with local codes. Remote installations should be in an accessible location, as close to the fixture as possible.
- Fixtures must be wired in parallel on independent leads; do not "daisy chain" multiple fixtures together or wire them in series.
- All factory-made splices and connections must remain intact. LED circuits are carefully designed and built, and improper connections may damage the fixture.
- The ends of coaxial pendant cords have been precisely stripped and split at the factory and must not be field cut. Excess cord or cable should be neatly coiled and reserved in the fixture canopy.
- Any mounting hardware is provided for your convenience and should be used with discretion. Always use the appropriate hardware for the mounting surface.

Assembly Instructions

INSTRUCTIONS D'INSTALLATION

Counterpoint Series - 4-Light LED Linear Pendant, 6-Light LED Linear Pendant

2884, 2884-J20

2886, 2886-J20

Important

- Always disconnect the power before installing or replacing bulbs and before cleaning or other maintenance.
- Consult a qualified, licensed electrician to ensure correct branch circuit conductor.
Consulter un électricien qualifié pour vous assurer que les conducteurs de la dérivation sont adéquats.

1. Shut off power to the outlet box (A).
2. Install the mounting bracket (B) to the ceiling with anchor (C) and screw (D), then screw the post (E) onto the mounting bracket (Fig. 1). Insert the cable (F) into the post and adjust to the desired length: to shorten, push the cable up; to lengthen, push in the plunger while pulling down on the cable, release the plunger to lock. Cut off the excess cable where it exits the post. Repeat step 2 for the second cable.
3. Use the screwdriver (G) to loosen the slotted set screw (H) and adjust the cord (J) to the necessary length to reach the outlet box (A) and secure by tightening the slotted set screw. Reserve extra cord in the canopy (K).
4. Make appropriate electrical connections using wire nuts:
 - a. Connect the LED driver's (L) live wire (black) to the live outlet box wire.
 - b. Connect the LED driver's neutral wire (white) to the neutral outlet box wire.
 - c. Connect the fixture's ground wire (green or uncoated) to the ground outlet box wire.
 - d. Carefully place connections and driver in outlet box (A).
5. Attach the mounting plate (M) to the outlet box (A) using the outlet box screws (N).
6. Install the canopy (K) to the mounting plate (M) and secure with the set screws (P) using the Allen key (Q).
7. Adjust the O-rings (R) as desired to secure the cord (J) to the cable (F)
8. Restore power to the fixture.

Note

- This fixture is dimmable with Electronic Low Voltage (Trailing-Edge) and Incandescent (Leading-Edge) type dimmers only.

Care Instructions

- **Dusting:** Use a clean, dry cloth.
- **Cleaning:** To protect the finish, avoid any harsh abrasives or chemicals.
